

# FIT RLC DAMPER

Our FIT™ RLC damper is now available in TALAS® and FLOAT® 36 160 models, offering riders an incredibly wide range of low-speed compression, lockout, and rebound adjustments in a new, lighter-weight damper that provides unparalleled front wheel terrain following.

## IN CLOSED MODE (LOCKOUT ON)

Unique bladder design, which provides the lowest possible friction for a sealed damper, reduces fluid aeration for enhanced suspension consistency, and reduces unsprung weight for faster wheel response and increased steering precision

## IN OPEN MODE (LOCKOUT OFF)

### LEGEND

- = Rebound flow path
- = Compression flow path

Rebound knob is now located on the bottom of the damper

# FIT TERRALOGIC DAMPER

The 15-position Terralogic® threshold adjuster allows settings anywhere from lockout firm to completely open, allowing the rider to tune it for anything from XC races to All-Mountain epics.

**LEGEND**

- = Rebound flow path
- = Compression flow path

# FIT RC2 DAMPER

Introducing the FIT RC2 inverted damper, the industry benchmark for damping performance and reliability, offering the same range of adjustability — now easily accessible from the top of the stanchion.
