# SHOCKS NEED LOVE TOO

## INSTALLATION GUIDELINES

Always use a chassis lift for the installation of shocks, and make certain that the raised vehicle is securely attached to the lift to prevent the vehicle from slipping, falling, or moving during the installation process.

DO NOT install any FOX products without the necessary special tools, expertise and chassis lift, or you will subject yourself to the risk of serious INJURY or DEATH. If you elect to not use a chassis lift (which election may result in SERIOUS INJURY or DEATH), ensure that the vehicle is on level ground, that all tires on the ground during installation are blocked to prevent vehicle movement, that at least two tires are the ground at all times, and that adequately secured jack stands are used to support the vehicle. NEVER get under the vehicle until you have checked to ensure that the vehicle will be stable during installation.

FOX direct-replacement shocks are designed to fit your vehicle's shock mounts with no modifications with the exception of reservoir placement on specific models and applications.

In most cases, FOX direct replacement, smooth body shocks are mounted with the shock body oriented on top.

## SERVICE AND UPGRADES

Have your FOX shocks serviced or upgraded by FOX technicians. Call our Powersports Service Center to go over the service and upgrade options available for your shocks. Once you have setup your service or upgrades you will receive a return authorization number and shipping instructions.

### FOX Midwest Service Center

13461 Dogwood Drive  
Baxter, MN 56425  
831.740.4619  
psservicemw@ridefox.com

## SERVICE INTERVALS

Under normal use conditions, the shock absorbers should be serviced every year. Racing or extreme use may require more frequent service.
